

25X1

December 9, 1958

Dear 

25X1

Please accept this letter as further confirming our earlier letter of December 2nd and adding further clarification with regard to the last paragraph on page 1. The anticipated cost indicated there is that related to converting the existing prototype electronic system which presently exists. The sum of \$3,000.00 stated therein should have been more clearly stated and it is for this purpose that these additional comments are made. The cost indicated in our letter of December 2nd is already incorporated in our new quotation as shown in our letter of November 19, 1958. This is not to be misconstrued as funds required above those indicated in our letter of November 19th.

With the redesign of the automatic exposure control the new amplifier package will replace the present sequence timer assembly, thereby converting the present prototype camera system to a prototype similar to the next five units to be fabricated in accordance with the obviously stated change in specifications.

We shall look forward to hearing from you at your earliest convenience.

Sincerely,

25X1
